

Prism Asset Manager® Features

When it comes to managing your IT environment, knowledge is power. Prism Asset Manager delivers complete insight into and control over your computing environment, so you can make better business decisions.

Prism Asset Manager collects and analyzes data on all installed software and hardware assets, giving you the information needed to ensure license and regulatory compliance, while reducing costs and automating IT asset management processes.

Prism Asset Manager is part of New Boundary Technologies' Prism Suite of desktop management solutions. The Prism Suite also includes Prism Deploy® and Prism Patch Manager®.

Smart Update™	Prism Asset Manager's powerful Smart Update™ technology empowers dynamic inventory updates without the need for repeated network scans. Using rules-based, real-time configuration groups, Prism Asset Manager empowers true inventory-based configuration management with automated remediation.
Internet-Based Administration	Prism Asset Manager makes managing your mobile workforce and widely distributed environments easy, while enabling secure administration from any remote location with an Internet connection.
Simplified Data Consolidation	Prism Asset Manager makes it simple to import non-scannable assets, discover all connected IT assets and edit asset information — delivering you a complete picture of assets under management to make smart and timely decisions.
Application Knowledge Base	Prism Asset Manager maintains a knowledge base of more than 10,000 software applications and their component files.
No Hidden Costs	Prism Asset Manager is easy to learn, easy to use and easy to implement — eliminating hidden expenses like training and implementation consulting.
Application License Usage	Prism Asset Manager provides critical insight into how often applications are being used on the individual level — allowing you to remove and reallocate licenses accordingly to limit or eliminate overspending on software licenses.
Customizable Console	The Prism Console is extremely flexible and highly customizable, so it works the way you work. You can even snap-in tools from other vendors and launch them directly from the Prism Console.
Comprehensive Reporting	A dynamic reporting engine creates standard or customized reports that match your processes and help you make better-informed decisions.
License Management	Prism Asset Manager accurately identifies all software that is installed and automatically determines compliance with available licenses, so you can better plan for software procurement and migration, as well as software audits.
Standards Compliance	Inventory information helps you create standard server, desktop and laptop configurations to drive improved IT, help desk and organizational efficiency.
